

Tool	Purpose
Read	Read files
Edit	Edit files (diff-based)
Write	Create/overwrite files
Bash	Run shell commands
Glob	File pattern matching
Grep	Content search (ripgrep)
Agent	Spawn subagents
Skill	Invoke skills
ToolSearch	Load deferred tool schemas
TaskCreate/Get/List/Update/Stop/Output	Task management

Subagent Types (via Agent tool)

Agent	Purpose
general-purpose	Research, multi-step tasks, codebase search
statusline-setup	Configure Claude Code status line
Explore	Fast codebase exploration
Plan	Software architecture & implementation planning
claude-code-guide	Claude Code CLI / API / SDK questions
superpowers:code-reviewer	Code review after major steps
xhtml-manuscript-processor	XHTML manuscript editing/EPUB prep
epub-template-enforcer	EPUB template compliance fixing

MCP Servers

Server	Purpose
Context7	Live library/framework documentation lookup
Figma	Read/write Figma designs, Code Connect, FigJam
Gamma	Generate AI presentations, docs, webpages
Canva	Canva design integration
Cloudflare (x2)	Cloudflare Developer Platform
Gmail	Email management
Google Calendar	Calendar management
Google Drive	Drive file access
Linear	Issue/project tracking

Sentry	Error monitoring	
Stripe	Payment integration	
Tavily	AI-powered web search	
Vercel	Deployments, projects, runtime logs, toolbar	
Mailerlite	Email marketing automation (50+ tools)	
Mem	Persistent memory	
Granted	Grant/funding search	
Vibe Prospecting	B2B prospecting & enrichment	
gr	(Authentication-based service)	
claude-mem / mcp-search	Cross-session AI memory search	
mcp-installer	Install local/repo MCP servers	

Upstash Context7	Additional Context7 instance

Skills (invoked via /skill-name or Skill tool)

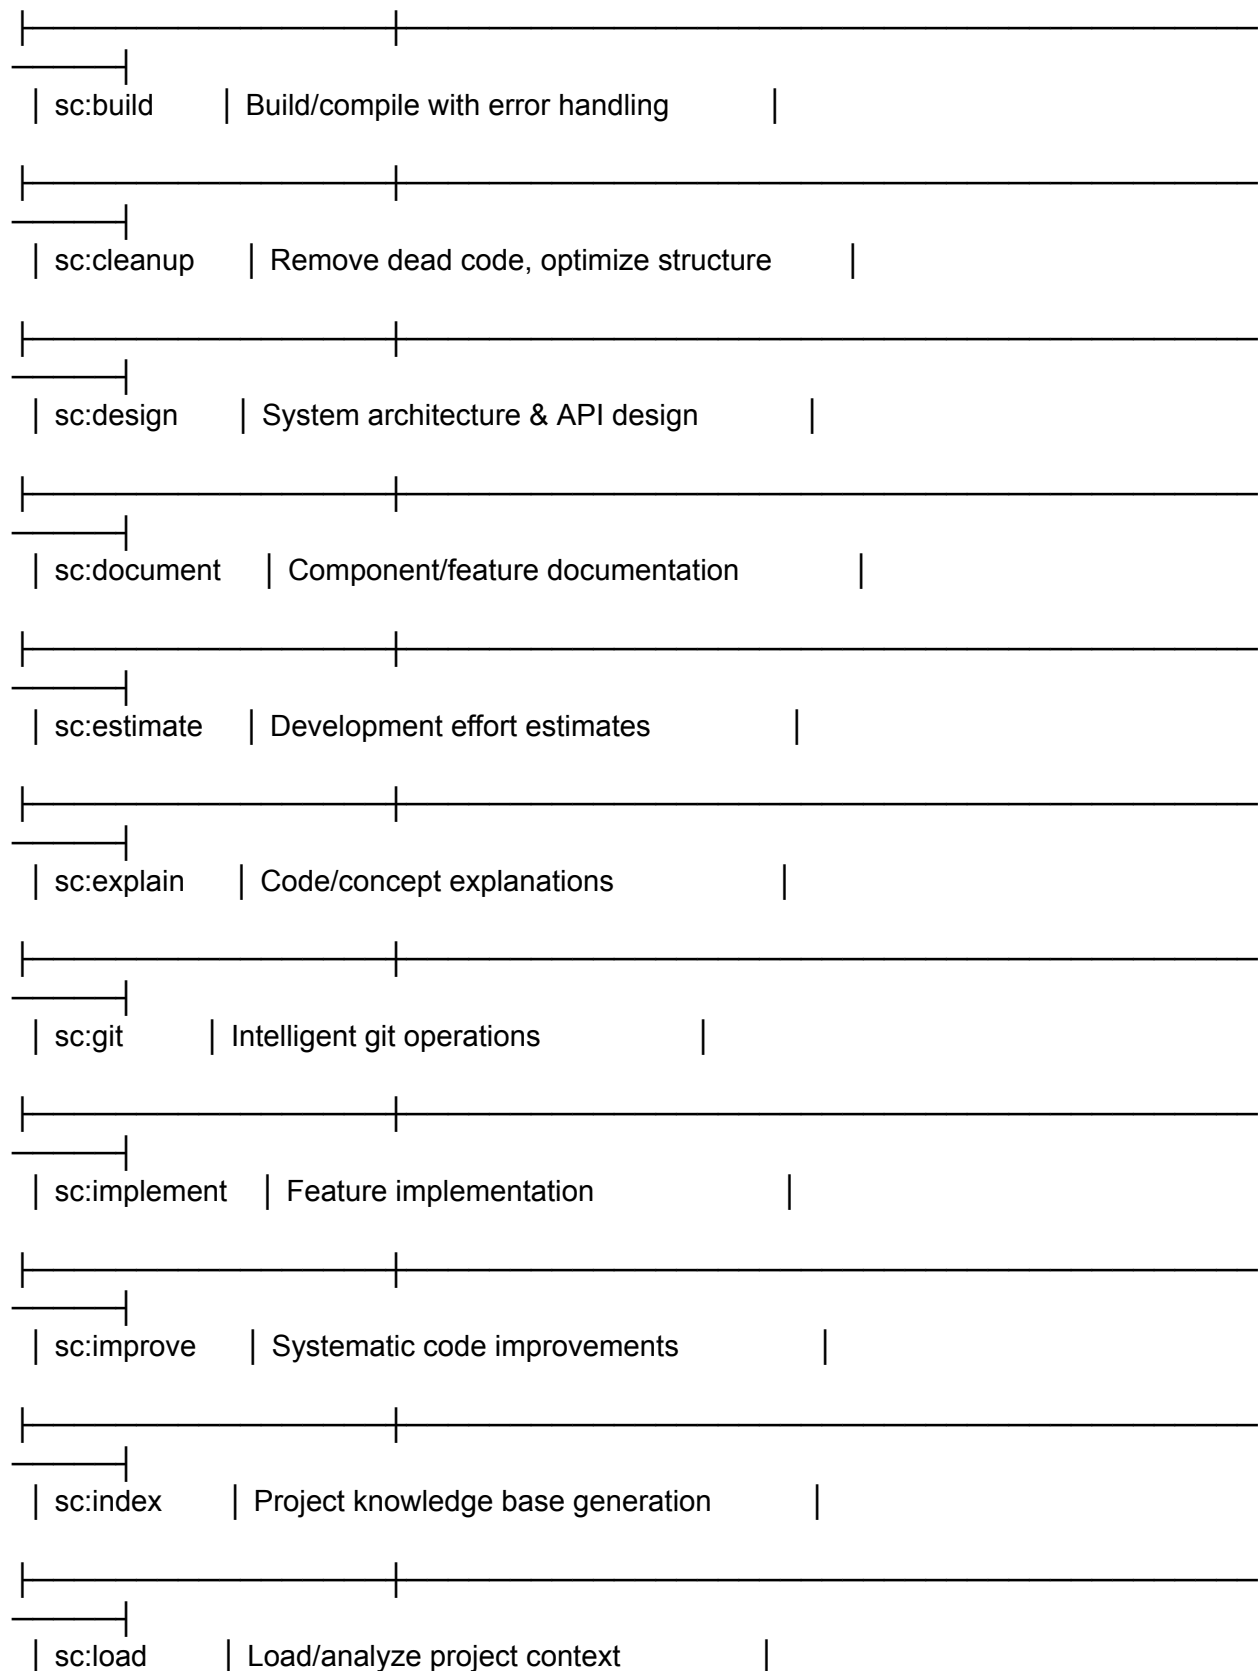

SuperClaude Core Workflows

Skill	Purpose
superpowers:brainstorming	Required before any creative/feature work
superpowers:writing-plans	Create multi-step implementation plans
superpowers:executing-plans	Execute written implementation plans
superpowers:subagent-driven-development	Parallel subagent implementation
superpowers:systematic-debugging	Debug any bug/test failure
superpowers:verification-before-completion	Verify before claiming done

superpowers:requesting-code-review	Request code review	
superpowers:receiving-code-review	Process code review feedback	
superpowers:finishing-a-development-branch	Ship-ready branch workflow	
superpowers:test-driven-development	TDD workflow	
superpowers:writing-skills	Create/edit skills	
superpowers:using-superpowers	Session initialization	
superpowers:dispatching-parallel-agents	Parallel agent dispatch	
superpowers:using-git-worktrees	Git worktree isolation	

SC (SuperClaude) Commands

Skill	Purpose	
sc:analyze	Code quality, security, performance analysis	

sc:spawn	Complex task decomposition
sc:task	Complex task management
sc:test	Test execution & coverage
sc:troubleshoot	Diagnose and resolve issues
sc:workflow	Implementation workflows from PRDs

Development Workflows

Skill	Purpose
ship	Full ship workflow (tests → review → merge)
land-and-deploy	Merge PR + wait for CI + deploy
review	Pre-landing PR review

simplify	Post-change code quality review
checkpoint	Save/resume working state
investigate	Systematic root cause debugging
health	Code quality dashboard
retro	Weekly engineering retrospective
claude-api	Build/debug Claude API apps

Browser & QA

Skill	Purpose
browse	Headless browser QA testing
gstack	Headless browser (alternative)
open-gstack-browser	Launch AI-controlled Chromium
qa	Full QA test + fix bugs
qa-only	Report-only QA testing
canary	Post-deploy canary monitoring

benchmark	Performance regression detection
devex-review	Live developer experience audit

Design

Skill	Purpose
frontend-design:frontend-design	Production-grade frontend UI
design-consultation	Product design research
design-html	Production HTML/CSS finalization
design-review	Visual design QA
design-shotgun	Multiple AI design variants

Project Management

Skill	Purpose
-------	---------

loop	Recurring task / self-paced polling
schedule	Cron-scheduled remote agents
autoplan	Auto-review pipeline (CEO/eng/design)
office-hours	YC-style startup/code office hours
plan-ceo-review	CEO-mode plan review
plan-design-review	Designer-eye plan review
plan-devex-review	DevEx plan review
plan-eng-review	Eng manager plan review

Claude-Mem (AI Memory)

Skill	Purpose
-------	---------

claude-mem:make-plan	Phased implementation plan
claude-mem:do	Execute plan via subagents
claude-mem:version-bump	Semantic versioning & release
claude-mem:knowledge-agent	Build/query AI knowledge bases
claude-mem:timeline-report	Narrative project journey report
claude-mem:mem-search	Search cross-session memory
claude-mem:smart-explore	AST-powered code structure search

Utility

Skill	Purpose
update-config	Configure Claude Code settings/hooks

keybindings-help	Customize keyboard shortcuts	
careful	Safety guardrails for destructive commands	
guard	Full safety mode	
freeze	Restrict edits to a directory	
unfreeze	Clear freeze boundary	
cso	Chief Security Officer mode	
learn	Manage project learnings	
pair-agent	Pair remote AI agent with browser	
document-release	Post-ship documentation update	
codex	OpenAI Codex CLI wrapper	
setup-browser-cookies	Import Chromium cookies to headless browser	

setup-deploy	Configure deployment settings
gstack-upgrade	Upgrade gstack to latest version
code-review:code-review	PR code review

Total: ~20 built-in tools, 8 subagent types, 19 MCP servers, 60+ skills.

✱ Brewed for 56s

➤ what about the commands for sales13 pr prompting or things like l99 and ooad list all plugins like security review code review etc gstack

Searched for 8 patterns, read 2 files, listed 2 directories (ctrl+o to expand)

- Now I have the full picture. Here's the complete, accurate breakdown of everything installed:

Installed Plugins (5 total)

Plugin	Publisher	Version	Scope
superpowers	claude-plugins-official	5.0.7	user
code-review	claude-plugins-official	unknown	user

frontend-design	claude-plugins-official	unknown	user		
claude-mem	thedotmack	12.1.0	user		
canvas	claude-canvas	0.1.0	project (home)		

All Skills by Plugin

superpowers plugin

Command	Purpose			
/superpowers:brainstorming	Required before any creative/feature work			
/superpowers:writing-plans	Create multi-step implementation plans			
/superpowers:executing-plans	Execute a written plan step-by-step			
/superpowers:subagent-driven-development	Parallel subagent implementation			

/superpowers:systematic-debugging	Structured debugging for any bug/failure	
/superpowers:verification-before-completion	Verify work before claiming done	
/superpowers:requesting-code-review	Trigger code review request workflow	
/superpowers:receiving-code-review	Process incoming review feedback	
/superpowers:finishing-a-development-branch	Pre-ship branch checklist	
/superpowers:test-driven-development	TDD workflow (tests before code)	
/superpowers:writing-skills	Create or edit skills	
/superpowers:using-superpowers	Session init / skill discovery	
/superpowers:dispatching-parallel-agents	Launch multiple agents in parallel	
/superpowers:using-git-worktrees	Isolate feature work in worktrees	

code-review plugin

Command	Purpose
/code-review	Automated PR review via 4 parallel agents — bugs, CLAUDE.md compliance, git history context, confidence-scored (threshold 80)

frontend-design plugin

Command	Purpose
/frontend-design:frontend-design	Production-grade UI with bold aesthetics, distinctive typography, animations — avoids generic AI look

claude-mem plugin (thedotmack)

Command	Purpose
/claude-mem:make-plan	Create phased implementation plan with docs
/claude-mem:do	Execute plan using subagents

/claude-mem:version-bump	Semantic versioning & release workflow
/claude-mem:knowledge-agent	Build/query AI knowledge bases
/claude-mem:timeline-report	"Journey Into [Project]" narrative report
/claude-mem:mem-search	Search persistent cross-session memory DB
/claude-mem:smart-explore	AST/tree-sitter structural code search

canvas plugin (claude-canvas)

Command	Purpose
/canvas	Spawn interactive terminal TUI panels
canvas:calendar	Calendar + meeting picker (tmux pane)
canvas:document	Markdown document viewer/editor
canvas:flight	Flight comparison + seat selector

gstack Skills (browser automation framework)

gstack is the underlying headless browser engine. All these run via /gstack prefix or directly:

Skill	Purpose
gstack	Core headless browser for QA/dogfooding
open-gstack-browser	Launch visible AI-controlled Chromium with sidebar
connect-chrome	Connect to existing Chrome instance
browse	Headless browser QA testing
qa	Full QA test cycle + auto-fix bugs
qa-only	Report-only QA (no fixes)
benchmark	Performance regression detection
canary	Post-deploy monitoring
devex-review	Live developer experience audit
setup-browser-cookies	Import real Chromium cookies

setup-deploy	Configure deployment settings
gstack-upgrade	Upgrade gstack to latest version

SuperClaude /sc: Commands (built into CLAUDE.md config)

Command	Purpose
/sc:analyze	Security, perf, architecture analysis
/sc:build	Smart build with framework detection
/sc:improve	Evidence-based code improvement
/sc:design	System architecture design
/sc:test	Testing + coverage
/sc:troubleshoot	Root cause debugging
/sc:implement	Feature implementation
/sc:cleanup	Dead code removal

/sc:document	Component documentation
/sc:estimate	Dev effort estimates
/sc:explain	Code/concept explanations
/sc:git	Intelligent git operations
/sc:index	Project knowledge base
/sc:load	Load project context
/sc:spawn	Complex task decomposition
/sc:task	Multi-session task management
/sc:workflow	Workflows from PRDs

Dev Workflow Skills

Skill	Purpose
/ship	Full ship: tests → review → merge
/review	Pre-landing PR review

/land-and-deploy	Merge + CI wait + deploy
/investigate	Systematic root-cause debugging
/health	Code quality dashboard
/retro	Weekly engineering retrospective
/checkpoint	Save/resume working state
/autoplan	Auto-review pipeline (CEO/eng/design)
/learn	Manage project learnings
/document-release	Post-ship docs update
/claude-api	Claude API / Anthropic SDK apps
/codex	OpenAI Codex CLI wrapper
/pair-agent	Pair remote AI agent with browser

--	--

Planning & Review Skills

Skill	Purpose
/plan-ceo-review	CEO/founder-mode plan critique
/plan-eng-review	Eng manager plan review
/plan-design-review	Designer's eye plan review
/plan-devex-review	DevEx plan review
/office-hours	YC-style startup or code office hours

Safety & Access Control Skills

Skill	Purpose
/careful	Warn before destructive commands
/guard	Full safety mode (careful + freeze)

/freeze	Lock edits to specific directory
/unfreeze	Remove freeze boundary
/cso	Chief Security Officer mode

Scheduling & Looping Skills

Skill	Purpose
/loop	Run prompt/command on recurring interval
/schedule	Create cron-scheduled remote agents
